

Become a Data Center Specialist (IT)

Data Center Specialists in IT are an elite group of experts who have demonstrated their commitment to the data center industry and to their professional development.

If you work in any aspect of data center IT this internationally recognized training is for you:

Data Center Operator // Project Manager // Storage Architect // Business Continuity Planner // Data Management Specialist // IT Consultant // Network Manager // Enterprise Application Developer

Why DCProfessional Development?

We have built an international network of data center and domain experts who we work with to develop and deliver groundbreaking training using the latest educational techniques.

Our classroom course instructors are the best in the business, each with a minimum of 10 years' project experience in the field. We are also the only provider to offer a range of online modules to complement your classroom training.

Our courses are endorsed by a range of international accrediting bodies, allowing you to earn Professional Development Hours throughout your training.

- Unlimited access to our exclusive online knowledge bank throughout your training
- 50% off additional online courses
- Publicize your skills and use the Data Center Specialist logo on your business stationary

How long does it take?

To complete the Data Center Specialist - IT Credential you will complete a total of 77 classroom hours and 40 hours of online modules.

In addition you'll need to provide detailed project experience and a full CV with references which will be vetted by an external auditor.

"The courses are expertly delivered with the most up to date information by the experienced DCProfessional Development team."

JAMES INDER,
Jersey Telecom

What will you learn?

DATA CENTER DESIGN AWARENESS

From site selection to cabling infrastructure, this course focuses on the key skills required to understand the design concepts and interdependencies associated with each discipline.

ENERGY EFFICIENCY

This Energy Efficiency course explores strategies for effective use of energy within the data center. It incorporates standards by the EU Code of Conduct, ASHRAE, The Green Grid and BCS – The Chartered Institute for IT.

DATA CENTER STORAGE AND DATA PROFESSIONAL

Covering the fundamentals of developing a company-wide "data quality" program. This course covers the organization, administration and governance of large volumes of data, using business intelligence tools and analysis of big data.

DATA CENTER COMPUTING PROFESSIONAL

This course explores the impact of computing on the data center, as well as the knowledge of how to implement proper architectures and equipment to complement the rest of the data center.

You will also be able to choose 5 online modules from our Foundations of Mission Critical Infrastructure range.
