Data Center Health and Safety

1-HOUR ONLINE INDUCTION PROGRAM

DCProfessional Development has developed an induction program for your entire data center staff. Covering topics including mission critical awareness and health and safety this online course is designed for anyone working in and around the data center.

Learning Outcomes

- Explain the role of a data center and how it relates to the corporate enterprise mission critical culture
- Describe the concept of critical awareness and its importance to the mission critical industry, the client’s needs and the corporate bottom line
- Identify how to assess and communicate risk and take preventative action
- Recognize conditions that are hazardous to a mission critical data center
- Identify the different types of mission critical equipment and its importance to the data center
- Outline the key standard operating procedures, alarm response and emergency action procedures and their role in reducing human error

5 reasons to choose DCProfessional Development induction training:

1. Courses aligned to international standards
2. Training developed by renowned industry experts
3. Customize with your own branding
4. Benefit from our Flexible Pricing Model
5. Interactive Learning Experience
